Margarita Machine

Do Not:

- Start the machine with ice slabs in bowl
- Overfill tank (max. capacity of 3 gallons)
- Set to liquid or slush mode before turning on main power

To Operate:

1. Turn main power switch to the “I” position
2. Add your margarita mix into the bowl*
3. When green light on control panel has turned on, turn the right switch (out of 2) for the bowl to the “II” position for slush or to “I” position for liquid
4. Turn left switch to “I” position to make mix begin to rotate

***Note:**

- **Margarita mix should consist of 1/3 water, 1/3 alcohol, and 1/3 mix itself; if not adding alcohol, use 2/3 water and 1/3 mix itself**
- **It takes approx. 45 minutes for margaritas to be ready**
- **For the 2-Bowl machine, left set of switches works left bowl and right set for the right bowl**

To Clean:

1. Empty all of your beverage out of the machine
2. Turn switch for bowl to “I” for liquid position
3. Fill bowl with hot water and let circulate for approx. 1 minute
4. Empty water
5. Turn all switches on the bowls control panel to “O” position
6. Turn main power switch to “O”
